

Test Specialist of Electronic Equipment

Role:

- To ensure the equipment is properly tested, calibrated and certified according to the corresponding procedures
- To ensure the equipment is loaded with the latest release of the related software, firmware and the necessary database if applicable
- To ensure the equipment corresponds to the customer's order and it is set for this purpose
- To participate in creating procedures for testing, calibration and verification of the equipment, cooperating with the developers
- To address all issues found when testing or repairing to the Production Manager for directing to the appropriate departments
- To participate in the root cause analysis when product failure occurs

Education and Experience

- 5+ years' experience in quality control and testing
- Bachelor degree in electrical engineering (Preferred)
- Good communication and interpersonal skills
- Problem solving and analytical reasoning skills required

D & V Electronics Ltd. values their employees. We encourage life-long learning and foster employee personal growth. If you're someone who enjoys working in a creative and innovative work environment, and would like to join our team, please submit your resume and covering letter to: careers@dvelectronics.com or fax us at (905) 264-0502.

We thank all applicants for their interest in our organization, however; only those selected for an interview will be contacted.
