

## Senior Test Specialist of Electronic Equipment

### Purpose:

- Implement plans, processes and jigs, which will improve the testing quality and time.
- Participate in root cause analysis when warranty issues.
- To participate in design verification of new equipment
- To test, calibrate and certify the company's equipment, modules and subassemblies.
- To troubleshoot and repair returned products from the customers.
- To participate in continual improvement for the testing and QC processes

### Role:

- To ensure the equipment is properly tested, calibrated and certified according to the corresponding procedures.
- To ensure the equipment is loaded with the latest release of the related software, firmware and the necessary database if applicable.
- To ensure the equipment corresponds to the customer's order and it is set for this purpose.
- To participate in creating procedures for testing, calibration and verification of the equipment, cooperating with the developers.
- To address all issues found when testing or repairing to the Production Manager for directing to the appropriate departments.
- To participate in the root cause analysis when product failure occurs.

### Education and Experience:

- 10+ years' experience in testing of custom made electronics and electrical equipment.
- Bachelor or Master degree in electrical engineering (Preferred)
- Able to develop test procedures, processes etc.
- Able to lead and train a small test team, with strong leadership skills
- Good communication and interpersonal skills
- Problem solving and analytical reasoning required
